EDUCATION

- **KIET Group of Institutions, Ghaziabad** CGPA: 8.3
B.Tech. in Computer Science (Artificial Intelligence) Jan 2026
- **Central Board of Secondary Education (CBSE)** Percentage: 89.0
Senior Secondary March 2023
- **Central Board of Secondary Education (CBSE)** Percentage: 98.0
Secondary March 2021

EXPERIENCE

- **Infosys Springboard**  July 2025 - Oct 2025
AI Intern Mysore, India
 - Developed the **Ridewise Bike Sharing Demand App**, boosting prediction accuracy from 90% to 96% (+6.67% gain) on a 50K-sample dataset by engineering 15+ time-series features from weather APIs and urban event data, reducing forecasting errors by 25% during peak hours.
 - Built an **Explainable AI visualisation pipeline** using spline-based modeling for time-series features, cutting visualization processing time by 40%.
 - Uncovered actionable insights via **Permutation Importance and SHAP values**, pinpointing top-5 features (e.g., temperature, events) that drove 68% of variance.

PROJECTS

- **Real-Time E-Commerce Fraud Detection System** Jan'26-Feb'26
Tools: Python, LightGBM, Isolation Forest, Flink, Redis, Docker, FastAPI, Optuna, Prometheus, Grafana 
 - Designed **end-to-end pipeline** handling 10K+ TPS with <50ms p99 latency, slashing false positives by 40% on simulated 1M daily transactions.
 - Engineered hybrid **LightGBM + Isolation Forest** models, delivering 94% F1-score (vs. 87% baseline) on 5:95 imbalanced fraud data
 - Engineered 20+ real-time features (e.g., transaction velocity, geolocation anomalies) using **Apache Flink** stateful processing and **Feast Feature Store** (Redis online: <10ms retrieval), achieving 95% pipeline consistency, 2x faster computation, and 100% elimination of training-serving skew.
 - Deployed **scalable FastAPI microservice on AWS ECS** (Dockerized), with **Prometheus/Grafana** monitoring alerting on 99.5% uptime.
- **Ames House Prices Prediction App** April 2025-May 2025
Tools: Python, XGBoost, Ridge Regression, Streamlit, SHAP, Scikit-learn, Pandas, Kaggle Ames dataset 
 - Built **interactive ML app** predicting prices for 1,000+ Ames houses, boosting R^2 from 0.82 to 0.88 via **XGBoost ensembles and Ridge Regression** baselines on Kaggle dataset.
 - **Engineered 15+ features** (sqft, rooms, garage, amenities) with outlier clipping (z-score >3) reducing RMSE by 12% from baseline.
 - Deployed **real-time Streamlit app** handling 50+ predictions/minute, with interactive feature importance plots.

SKILLS

- **Programming Languages**: Python, C, C++
- **Libraries/Frameworks**: Pandas, NumPy, Scikit-learn, XGBoost, Matplotlib, Seaborn, Streamlit, HTML, CSS, TensorFlow, Keras
- **Tools**: Linux, Git, GitHub, Docker

CERTIFICATIONS

- **Amazon Web Services, AWS Certified AI Practitioner AIF-C01** November 12, 2025-November 12, 2028

ACHIEVEMENTS

- [Ranked 3403 out of 10k+ participants in the Amazon ML Challenge 2025](#)

POSITIONS OF RESPONSIBILITY

- **PR Lead**, School of AI/ML & DS, KIET Dec 2025
